

Announcement # 22-53

Date: September 02, 2022

Loan Document Delivery Update

In an effort to reduce our digital footprint and maintain the highest level of portal speed, Pennymac requests that non-essential documents be eliminated from the uploaded seller credit packages effective immediately.

A prime example is the **CFPB Home Loan Toolkit**. If that document is currently part of your delivered file, we ask that you please remove.

We appreciate your prompt attention to this and please contact your Sales Representative or PAM with any questions.
